## About This Content

Capturing the details and bustle of a busy modern city is both challenging and time-consuming. Wouldn't you want a quick and easy shortcut to make modern mapping easier? Fantasy Buildings: Modern is just the pack for you!

Created by Celianna, this large and versatile pack contains over 45 buildings, in addition to several ground auto-tiles and detailed objects. Many of the buildings include several variations, allowing you to build realistic modern city environments. This pack was formatted to be used in RPG Maker VX-Ace editor or with parallax mapping, ensuring that everyone can use it - no matter how you prefer to map.

This pack contains:

- A variety of modern homes, including houses, apartment buildings, duplexes and high rises.
- Specialized buildings such as restaurants, hospitals, office buildings, automotive garages, retail stores and more.
- Easy to use materials -- already formatted into tile sheets for you!
- Material that matches the RTP, as well as the large variety of Celianna's resources.

rpg maker vx ace - fantastic buildings modern

to short for a stand alone... nice resolutions. Decent game for the price,controls are a bit naff but still a enjoyable game, the music is very calming.. Join a game can't even make the difference between enemy&allies everyone team kill?? wtf is that game. Lost childhood.... This program even can't start. I saw many streamers play ESEA. But I can't start this program. And my antivirus says it is virus. Well fix it.

I love this game. It was my first steam buy in 2009 and I still play it. It's an adventure game, with lots of mini-games. The game is plenty long, Everytime i thought it was over there was another chapter, which i really liked and made me feel like this was a solid buy.. Wonderful little VR experience . Bright vibrant moving colours together with 'musical chime' tones really add a relaxing feeling to the whole thing. Definitely worth the purchase price, especially if you like things with a quirky edge. Recommended!. this game is a nightmare for people without a controller. The keyboard controls are♥♥♥♥♥and you cant use the mouse. Not worth the money at all also if you do buy it prepare your ears for a major♥♥♥♥♥at the begining. Doesn't have Chinese hackers

- Doesn't kill you from falling 5 feet
- Doesn't have unnecessarily overpriced cosmetics on the steam market
- Isn't competitive
- Doesn't have 45 different test servers
- Doesn't claim to be the founder of the battle royale genre
- Doesn't sue more successful game companies that use said battle royale genre

Way better than unnamed game that I am referencing. I'm not really good with words, but this is a really wonderful game y'all, and everyone should play it. It's completely worth the price of admission, and I sincerely wish this developer the best for this game and any games that follow.. Do you want to click a lot of things until they die, emphatically? Do you want to play as Markiplier wielding twin cyber-blades and wearing some rando's football jersey? Do you enjoy games with a LOT of background gags and weird visual humor just scattered everywhere like joke confetti?

If so get this game. If not, it's like 5 bucks: Get it anyways. :V. It's so cute!. Best 3 euro I've ever spent! You can even play as a Snowowl! <3. worth the couple bucks. fun little story, paced well. cool art style. really enjoyed being able to change the music (which is great, by the way) to fit the scene. if you enjoy point and click stuff and you are looking for something that doesnt require much effort, this one will give you 1-2 hours of fun. this is no 'myst'.. its pretty much impossible to fail or get stuck. just wish there was more!
